Safer Internet Day 2020

Dear colleagues, dear students,

We can only protect the IT infrastructure of KIT, our data and work results together!

We continuously update the KIT recommended IT security materials, which are also available in English. You will find the flyers "IT security: Identifying fraudulent messages" and other materials on our [webpage](https://www.kit-univ.edu/sid2020en).
Click or tap to follow link.

After your positive feedback in 2019, we are again setting up an action stand: Tuesday, 11th of February 2020 between 11 to 14 o'clock at mensa Adenauerring (Campus south).

We look forward to share your experiences with the materials! You are also welcome to send your feedback via e-mail to beratung-itsec@scc.kit.edu.

Best regards,
Milan Burgdorf and the Safer Internet Day 2020 team (a cooperation of business units and research groups of KIT: AIFB, KASTEL, SCC, SECUSO, ZML)
